# Contents

**NUMBER 1**

1 Editorial

3 Interplay of tectonics and sea-level changes in basin evolution: an example from the intracratonic Amadeus Basin, central Australia *John F. Lindsay and R. J. Korsch*

27 Gravity studies of the Rockall and Exmouth Plateaux using SEASAT altimetry *Sue Fowler and Dan McKenzie*

35 The Palaeozoic history of the Western Desert of Egypt *Martin L. Keeley*

49 Extensional tectonic regimes in the Aegean basins during the Cenozoic *J. L. Mercier, D. Sorel, P. Vergely and K. Simeakis*

**NUMBER 2**

73 Simple equations of sedimentation: applications to sequence stratigraphy *Douglas J. Cant*

83 Stratal patterns: a proposal of classification and examples from the Dolomites *Carlo Doglioni, Alfonso Bosellini and Peter R. Vail*

97 An examination of some uncertainties associated with estimates of sedimentation rates and tectonic subsidence *Kerry Gallagher*

115 Subsidence, sedimentation and sea-level changes in the Eromanga Basin, Australia *Kerry Gallagher and Kurt Lambeck*

**NUMBER 3**

133 Lithospheric flexure due to prograding sediment loads: implications for the origin of offlap/onlap patterns in sedimentary basins *A. B. Watts*

145 Burial history of Late Neogene sedimentary basins on part of the New Zealand convergent plate margin *Patricia Wells*

161 Tectonic and sedimentary history of a late Cenozoic intramontane basin (The Pitalito Basin, Colombia) *J. G. M. Bakker, T. W. Kleinendorst and W. Geirnaert*

189 Mesozoic sedimentation rates in the Western Canada basin as indicators of the time and place of tectonic activity *V. E. Chamberlain, R. St J. Lambert and W. S. McKerrow*

203 Book Review

**NUMBER 4**

205 Extension and subsidence of the Pearl River Mouth Basin, northern South China Sea *Daquan Su, Nicky White and Dan McKenzie*

223 The interaction of eustacy and tectonism from provenance studies of the Eocene Hecho Group Turbidite Complex (South–Central Pyrenees, Spain) *Daniela Fontana, Gian Gaspare Zuffa and Eduardo Garzanti*

238 Tectono-sedimentary analysis of alternate-polarity half-graben basin-fill successions: Late Devonian–Early Carboniferous Horton Group, Cape Breton Island, Nova Scotia *Anthony P. Hamblin and Brian R. Rust*
